The SIA is looking for a

## Drupal Developer

(m/f/d, 60–100%, temporary post)

### YOUR NEW WORKPLACE

The Swiss Society of Engineers and Architects (SIA) is the leading professional association for construction engineering, architecture, technology and environment specialists. The SIA resolutely serves its membership as a proponent of high standards in *Baukultur* and shares in the overarching goal of a future-proof and sustainable living environment.

### YOUR TASKS

As a Drupal Developer you will be part of the Scrum DEV team in the SIA's IT department. Your main task will be developing the Drupal headless backend for the new SIA website and the new event management platform that will be implemented as part of the new SIA web platform.

### YOUR PROFILE

You have sound knowledge of developing in Drupal and many years of experience – especially with configuring workflows, content types, migrations, exposed API and taxonomy. The SIA uses mostly PHP and Python-based open source applications running inhouse on Linux. Developing and implementing creative concepts in an independent manner is a strength of yours. You find solving complex tasks a welcome challenge. You are fluent in either German, English or French; knowledge of the other languages is an advantage.

### OUR OFFER

You can expect varied work with extensive creative opportunities in a motivated and enriching environment. We offer good opportunities for your professional development and networking, a modern working environment and attractive employment conditions – including fair and equal remuneration for women and men. The position is initially time-limited to six months.

### YOUR NEXT MOVE

We look forward to receiving your application by email to Doris Wachter, SIA HR Manager, [doris.wachter@sia.ch](mailto:doris.wachter@sia.ch). For further details, please contact Davide Malnati, SIA Head of IT, 044 283 63 61, [davide.malnati@sia.ch](mailto:davide.malnati@sia.ch). You can find more information at [www.sia.ch/karriere](http://www.sia.ch/karriere)
