The SIA is looking for a

Full-Stack web developer
m/f/d, 60–100%, 6 months mandate

YOUR NEW WORKPLACE

The Swiss Society of Engineers and Architects (SIA) is the leading professional association for construction engineering, architecture, technology, and environment specialists. The SIA consistently dedicates itself to serving its members. Together with them, it is committed to Baukultur with the goal of a sustainable living environment of high quality.

YOUR TASKS

As a full-Stack web developer you will be part of our Scrum DEV team in the SIA's IT department. Thanks to your skills in various technologies and programming languages, you will be called upon to develop the front-end of a new web application based on tasks defined in the sprint and the chosen system architecture and technologies.

You will work with different technologies, specifically for front-end development in REACT, interfacing to a GraphQL API or RestAPI or interacting with our Keycloak based IdP.

YOUR PROFILE

You have sound knowledge and longstanding experience in web development – specifically with REACT, GraphQL APIs or RestAPIs. The SIA relies primarily on opensource systems and platforms running inhouse on Linux. You independently develop clear concepts meeting the defined requirements. You find solving complex tasks a welcoming challenge. You are fluent in either German, English or French; knowledge of the other languages is an advantage.

OUR OFFER

You can expect a varied job with broad creative opportunities in a committed and enriching environment. We offer good opportunities for your professional growth and networking, a modern working environment and attractive employment conditions – including fair and equal pay for women and men.

YOUR NEXT MOVE

We look forward to receiving your application by email to Doris Wachter, SIA HR Manager, *doris.wachter@sia.ch*. For further details please contact Davide Malnati, SIA Head of IT, 044 283 63 61, *davide.malnati@sia.ch*. You can find more information at *www.sia.ch/karriere*.
