# swiss squares app

discover swiss squares  
Interactive encounter with the real and virtual city  
through Augmented Reality.

Unique highlights concerning the history, current state and future of  
Aarau, Basel, Bern, Biel, Schaffhausen, Sitten, Thun, Winterthur, Zug and Zurich.

# swiss squares

discover swiss squares  
with your smartphone or tablet and augmented reality

Swiss Squares takes you on a trip to the most important squares in Switzerland's larger cities. Views from the past, present and future tell the story of how public squares have developed and how they continue to change.

The app works with *Augmented Reality*, i.e. the pictures of the squares can be displayed – using GPS – by the smartphone or tablet's camera. This allows live comparisons between the current situation, past times, future square designs and even alternative plans. At the same time, the app can be used independently of location, for example while you are sitting on your sofa at home.

## swiss squares app

your mobile guide to swiss squares

- unique highlights concerning the history, current state and future of Swiss squares
- interactive encounter with the real and virtual city through *Augmented Reality*
- can be used independently of location, for example on your sofa at home
- 4 languages: German, French, Italian and English
- free for iPhone, iPad and for Android devices
